👤 Profile

Passionate Learner with a strong interest in coding and problem-solving. Transformed complex challenges into simple, effective solutions while fostering a positive and collaborative team environment. Committed to honesty, support, and reliability, contributing actively to team success and growth.

🌐 Tech Stack

Languages: Python · C · C++ · Java

Web / Frontend: React · HTML · TypeScript

ML / Data: TF-IDF · Vector search concepts · NLPs

Tools: GitHub · VS Code · PyCharm · Vercel

📁 Projects

- **PESU Minecraft S2 Website** - <https://pesu-mc.vercel.app> 🔗
Built the frontend for the community site: events pages, server information, join instructions, and Vercel deployment.
- **Nautilus** (Mega project, beta) - <https://nautilus-v1.vercel.app> 🔗
Implemented flowchart generation and UI customization; core functionality and additional modules are under development.
- **Spheal** (Trip planning agent) - <https://spheal-worldwide.vercel.app> 🔗
Developed the demo frontend and initial agent workflows for destination planning; working on booking agent integration and MCPs.
- **Contour Flow Demo** - <https://contour-flow-test.vercel.app> 🔗
Designed a lightweight animated background component; optimized for smooth performance using public libraries and AI-assisted design.
- **AskBookie_** (Frontend for RAG) - <https://askbookie.vercel.app> 🔗
Built the frontend UI and integrated it with the RAG API for quick document Q&A; improved query UX. (Backend currently under maintenance)
- **Smart Chef** - <https://smart-chef-pesu.vercel.app> 🔗
Implemented an in-memory TF-IDF and cosine-similarity vector model in Python for fast recipe similarity matching; focused on algorithm correctness and prototype performance.
- **ThanasOS** (Portfolio) - <https://thanasr-old.vercel.app> 🔗
Created a macOS-style interactive portfolio: desktop-like navigation, project showcase.
