Education

- **PES University:** B.Tech CSE(AI ML)
- **Allen Career Institute:** 11th - 12th
- **Sri Vani Education Centre:** 1st - 10th

Projects

Nautilus

nautilus-build.vercel.app

A canvas based AI knowledge tool with mindmaps, flowcharts, and auto-linked concept cards forming dynamic graphs.

Virdis

virdis.vercel.app

An AI-powered platform that automatically maps farm boundaries and analyzes crop health using satellite time-series data, delivered through a well-designed, intuitive UI.

PESU Minecraft S2 Website

pesu-mc.vercel.app

Built the frontend for the community site: events pages, server information, join instructions, and Vercel deployment.

Smart Chef

smart-chef-pesu.vercel.app

Implemented an in-memory TF-IDF and cosine-similarity vector model in Python for fast recipe similarity matching; focused on algorithm correctness and prototype performance

ThanasOS

thanasr-old.vercel.app

Created a macOS-style interactive portfolio: desktop-like navigation, project showcase.

AskBookie_

askbookie.vercel.app

Built the frontend UI and integrated it with the RAG API for quick document Q&A; improved query UX.
